

Wet Weather Partnership

Quarterly Webinar

March 10, 2021

2:00 - 4:00 PM

Agenda

I. Introduction

II. Opportunities for Federally/State-Mandated Water/Sewer Program Re-Evaluations

This session will explore the impacts of COVID on operations and revenue and provide practical advice on how to get back on track, renegotiate timelines and priorities, and consider community affordability in the context of environmental justice.

Paul Calamita
Chairman
AquaLaw

III. Role of POTWs in the PFAS Battle: PVSC Case Study

Wastewater treatment plants around the nation are facing the specter of increased regulatory oversight of PFAS in wastewater and biosolids. Real-life concerns and comments from one state's WWTP community regarding potential PFAS regulation will be discussed, as well as short-term strategies and longer-term considerations when dealing with regulators.

Michael Witt
General Counsel
Passaic Valley Sewerage Commission

IV. Consultant Corner: Buffalo's Smart Sewer Program Outperforms Expectations on Capture and Cost Effectiveness

Buffalo's real time control program is exceeding expectations for performance and cost-effectiveness. This session will present the program to date and demonstrate the power of Smart Data Infrastructure combined with Adaptive Management toward achieving regulatory compliance.

Tim Braun
VP & Enterprise Architect
Xylem Vue

V. Discussion

VI. Conclusion
